Bangalore, India | 7760706902 | anirudhkichu1905@gmail.com | www.linkedin.com/in/anirudhp21 | <https://github.com/Anirudh735> |

PROFESSIONAL SUMMARY

Detail-oriented **BCA student** and aspiring **Full Stack Developer** specializing in **Artificial Intelligence** and **Machine Learning**. Experienced in building end-to-end applications, ranging from hardware-integrated IoT monitors to real-time object detection systems. Highly proficient in bridging the gap between hardware sensor data and software visualization.

TECHNICAL SKILLS

- **Languages:** Python (YOLOv8, Flask), JavaScript (ES6+), SQL, C++, Java, Kotlin.
- **AI & Machine Learning:** Deep Learning, Retrieval-Augmented Generation (RAG), Computer Vision, EasyOCR.
- **Web & Mobile Development:** HTML5, CSS3, React, Node.js, REST APIs, Mobile App Design (Kotlin & SQLite).
- **IoT & Electronics:** ESP32, Arduino Uno, Sensor Integration, Circuit Design, Firmware Development.
- **Tools & Platforms:** Git/GitHub, Linux, VS Code, Canva (UI/UX Design).

KEY PROJECTS

Traffic Violation Detection System

- Engineered an automated pipeline using YOLOv8 and EasyOCR to detect vehicles and recognize license plates in real-time.
- Developed a centralized Flask dashboard to visualize live detection data and manage historical violation logs.

Smart Soil Health & Compost Monitor

- Architected an IoT system using ESP32 to monitor soil pH, moisture, and temperature via integrated hardware sensors.
- Programmed cloud-based alert logic to optimize composting efficiency through remote real-time data tracking.

Expense Tracker Mobile Application

- Developed a native Android application using Kotlin to provide users with tools for daily financial tracking and budget management. Implemented SQLite for local data persistence to ensure secure and efficient storage of user transaction records.

CERTIFICATIONS

- **Ethical Hacking** – Udemy | March 2026
- **Deep Learning** – Simplilearn SkillUP | May 2025
- **Mastering Retrieval-Augmented Generation (RAG)** – Udemy | April 2025
- **Learn Python Masterclass** – Udemy | March 2025

EDUCATION

- **Bachelor of Computer Applications (AI & ML)** | Presidency University, Bangalore
 - June 2023 - May 2026 (Expected)

- **PCME** | St. Joseph's Pre-University College, Bangalore
 - *Aug 2021 - Mar 2023*
